## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by JP-08-2676679.

3. Section 0008 describes the cyclic monomers used. Additional outer layers can be present from materials such as polyethylene etc. [Section 0014] and blends are made with the cyclic olefin-containing polymer.

4. Regarding claims 6 and 7, while the claimed properties are not specifically taught, based on the polymers used and the conditions of formation it is reasonable to believe that the films taught would meet these limitations. Regarding claim 7, a range of 3-70% is quite large. A shrinkable film treated at a temperature below the glass transition temperature and then above, would shrink above the glass transition temperature since this temperature would be above orientation temperature (the temperature where shrinkage occurs).

5. The films are used for packaging purposes and are shrinkable [section 0021-0022].

### *Claim Rejections - 35 USC § 112*

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1773

7. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrasing of the claim is confusing, it is not clear if the claims intend to contain a norbornane component or not. It is not clear how the phrase "a ring structure have no norbornane ring structure in the repeating unit (a) is at least 10% by weight", should be interpreted. It is not clear if the cyclo component could be 100% of a non-norbornane cyclic material.

### *Conclusion*

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The examiner cites 6,017,616, 6451946, 6329047 and WO 01/96012 as being of interest.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. Lawrence Tarazano whose telephone number is (703)-308-2379. The examiner can normally be reached on 8:30 to 6:00 (off every other Friday).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul J Thibodeau can be reached on (703)-309-2367.
